Skills

Programming Languages
C, C++, HTML, CSS, Java Script

Frameworks and Libraries
React Js and Bootstrap

Computer Science
Object Oriented Programming

Soft Skills
Problem Solving, Team Work, Good Communication

Projects

React Crud Application

- Use React for building user interfaces with reusable components.
- Manage application state using React's useState hook or libraries like Redux.
- Implement navigation between different CRUD operations using React Router.
- Style components with CSS, frameworks like Bootstrap, or CSS-in-JS libraries.
- Create forms for Create and Update operations, display data for Read, and add delete functionality.

Shoe Listing Application

- Displaying shoes with details like name, price, images, and description using React components.
- Implementing features to filter shoes by categories (e.g., men's, women's, brands) and sort by price or popularity.
- Managing a user's selected shoes and quantities, allowing additions, updates, and removals.
- Guiding users through a checkout flow, including shipping information and payment details.
- Implementing login and registration functionality to manage user accounts and orders.

Education
